

A large, abstract graphic on the left side of the slide, consisting of several overlapping, curved, translucent blue shapes that resemble a stylized globe or a series of flowing ribbons.

豐富貿易有限公司

HARVEST BEST TRADING LIMITED

Our Company is Integrating Trade and Services, We are located in Hongkong. We have been Operating with a Good Reputation. We supply high-quality Petroleum, LPG,LNG, with top-standard delivery across the World. We also deal in by-products ,such as Petroleum coke and Asphalt etc.

We engage Directly with the Refineries & Strive to deliver the products within the stringent time frame.

**IMPORT // EXPORT
WORLDWIDE** 

全球能源结构中地位 Position in the global energy structure

01

主要能源来源 Main energy sources

石油是全球最重要的能源来源之一，被广泛用于交通运输、工业、农业、军事等领域。

Oil is one of the most important sources of energy worldwide, widely used in transportation, industry, agriculture, military, and other fields.

02

能源消费占比

Proportion of energy consumption

石油占全球能源消费的比重很大，是支撑全球经济运转的重要能源。

Oil accounts for a large proportion of global energy consumption and is an important energy source that supports the operation of the global economy.

03

战略地位重要 Strategic importance

石油是国家的战略资源，对经济发展、国家安全和地缘政治格局具有重大影响。

Oil is a strategic resource of a country, which has a significant impact on economic development, national security, and geopolitical landscape.

各类油品质量标准解读 Interpretation of Quality Standards for Various Oil Products

汽油标准 Gasoline standard

主要包括辛烷值、含铅量、硫含量、蒸气压等指标，不同国家和地区有不同的标准。

。

Mainly including octane number, lead content, sulfur content, vapor pressure and other indicators, different countries and regions have different standards.

润滑油标准 Lubrication standards

主要包括粘度、倾点、抗氧化性、抗磨性等指标，以满足不同设备的润滑需求。

Mainly including viscosity, pour point, oxidation resistance, wear resistance and other indicators to meet the lubrication needs of different equipment.

柴油标准 Diesel standard

主要包括硫含量、十六烷值、密度、闪点等指标，用于柴油发动机燃料。

Mainly including indicators such as sulfur content, cetane number, density, flash point, etc., used for diesel engine fuel.

沥青标准 Bitumen standard

主要用于道路建设和防水材料，其性能指标包括针入度、软化点、延度等。

Mainly used for road construction and waterproofing materials, its performance indicators include penetration, softening point, elongation, etc.

副产品综合利用途径 Comprehensive utilization of by-products

石油焦 Petroleum Coke

可用于制造电极、冶金焦炭、燃料等

。 Can be used for manufacturing electrodes, metallurgical coke, fuels, etc.

化工原料 Chemical raw materials

如石脑油、苯、甲苯等，可用于生产橡胶、塑料、纤维等。

Such as naphtha, benzene, toluene, etc., can be used to produce rubber, plastics, fibers, etc.

石油沥青 petroleum asphalt

可用于道路建设、防水材料等领域。
Can be used in fields such as road construction and waterproofing materials.

润滑油基础油 Lubricating oil base oil

通过进一步加工处理，可生产出各种牌号的润滑油，满足汽车、机械等设备的润滑需求。

Through further processing, various grades of lubricating oil can be produced to meet the lubrication needs of equipment such as automobiles and machinery.

交通运输领域应用分析 Application analysis in the field of transportation

燃油汽车 Fuel powered vehicles

石油是燃油汽车的主要能源，其动力来源于内燃机燃烧石油制品产生的热能。

Petroleum is the main energy source for fuel vehicles, and its power comes from the heat generated by the combustion of petroleum products in internal combustion engines.

航空运输 Air transport

航空煤油是航空领域的重要燃料，用于驱动飞机涡轮发动机。

Aviation kerosene is an important fuel in the aviation industry, used to drive aircraft turbine engines.

船舶运输 Shipping

船舶运输中，重油和渣油是主要的燃料，用于提供动力和发电。

In ship transportation, heavy oil and residual oil are the main fuels used to provide power and generate electricity.

铁路运输 Railway transportation

柴油是铁路运输的重要能源，尤其在电力不足或电力不稳定地区。

Diesel is an important energy source for railway transportation, especially in areas with insufficient or unstable electricity.

工业生产领域应用案例 Application cases in the field of industrial production

化工原料 Chemical raw materials

石油是化学工业的重要原料，如生产塑料、合成纤维、合成橡胶等。

Petroleum is an important raw material for the chemical industry, such as the production of plastics, synthetic fibers, synthetic rubber, etc.

机械制造 Mechanical manufacturing

石油产品如润滑油、液压油等，在机械制造和运行中起到关键作用。

Petroleum products such as lubricants, hydraulic oils, etc. play a crucial role in mechanical manufacturing and operation.

制药工业 Pharmaceutical industry

某些药品和医疗用品的生产需要石油作为原料，如抗生素、维生素等。

The production of certain drugs and medical supplies requires petroleum as a raw material, such as antibiotics, vitamins, etc.

建筑材料 Building material

石油产品如沥青、油漆等，在建筑领域有重要应用。

Petroleum products such as asphalt, paint, etc. have important applications in the field of construction.

居民生活领域需求 Residents' needs in the field of daily life

01

家庭用油 Household oil

石油产品如液化气、汽油等，是居民日常生活的重要能源，用于烹饪、取暖等。

Petroleum products such as liquefied gas, gasoline, etc. are important energy sources for residents' daily lives, used for cooking, heating, etc.

02

汽油需求 Gasoline demand

随着汽车保有量的增加，汽油需求持续增长，是石油消费的重要组成部分。

With the increase in car ownership, gasoline demand continues to grow and is an important component of oil consumption.

03

塑料制品 Plastic products

居民生活中大量使用塑料制品，如包装材料、日用品等，其原料大多来源于石油。

Plastic products, such as packaging materials and daily necessities, are widely used in residents' daily lives, and most of their raw materials come from petroleum.

04

化妆品 Cosmetics

某些化妆品的原料也来自石油，如矿物油、石蜡等。

Some cosmetic ingredients also come from petroleum, such as mineral oil, paraffin, etc.
